D1-D9 relate to a method for providing a general ringback tone for a caller or a called. None of the documents cited above teach an RBT(RingBackTone) replacing method in which an arbitrary RBT-replacing sound chosen or registered by a subscriber is provided as an RBT in case that the subscriber calls another who has not subscribed to the called-based RBT replacement service in which an arbitrary RBT-replacing sound chosen by a called is provided for a caller. This feature is not obvious to a person skilled in the art. Accordingly, the inventions as claimed in Claims 1-8 is considered to be novel and have an inventive step.

Claims 1-8 have industrial applicability under PCT Article 33(4), because the subject matter claimed can be made or used in industry.
